

Europe :: Latvia

Introduction :: Latvia

Background:

The name "Latvia" originates from the ancient Latgaliens, one of four eastern Baltic tribes that formed the ethnic core of the Latvian people (ca. 8th-12th centuries A.D.). The region subsequently came under the control of Germans, Poles, Swedes, and finally, Russians. A Latvian republic emerged following World War I, but it was annexed by the USSR in 1940 - an action never recognized by the US and many other countries. Latvia reestablished its independence in 1991 following the breakup of the Soviet Union. Although the last Russian troops left in 1994, the status of the Russian minority (some 28% of the population) remains of concern to Moscow. Latvia acceded to both NATO and the EU in the spring of 2004; it joined the eurozone in 2014.

Economy :: Latvia

Economy - overview:

Latvia is a small, open economy with exports contributing nearly a third of GDP. Due to its geographical location, transit services are highly-developed, along with timber and wood-processing, agriculture and food products, and manufacturing of machinery and electronics industries. Corruption continues to be an impediment to attracting foreign direct investment and Latvia's low birth rate and decreasing population are major challenges to its long-term economic vitality. Latvia's economy experienced GDP growth of more than 10% per year during 2006-07, but entered a severe recession in 2008 as a result of an unsustainable current account deficit and large debt exposure amid the softening world economy. Triggered by the collapse of the second largest bank, GDP plunged 18% in 2009. The economy has not returned to pre-crisis levels despite strong growth, especially in the export sector in 2011-12. The IMF, EU, and other international donors provided substantial financial assistance to Latvia as part of an agreement to defend the currency's peg to the euro in exchange for the government's commitment to stringent austerity measures. The IMF/EU program successfully concluded in December 2011. The government of Prime Minister Valdis DOMBROVSKIS remains committed to fiscal prudence and reducing the fiscal deficit. The majority of companies, banks, and real estate have been privatized, although the state still holds sizable stakes in a few large enterprises, including 99.8% ownership of the Latvian national airline. Latvia officially

joined the World Trade Organization in February 1999 and the EU in May 2004. Latvia intends to join the euro zone in 2014.

Transnational Issues :: Latvia

Disputes - international:

Russia demands better Latvian treatment of ethnic Russians in Latvia; boundary demarcated with Latvia and Lithuania; the Latvian parliament has not ratified its 1998 maritime boundary treaty with Lithuania, primarily due to concerns over oil exploration rights; as a member state that forms part of the EU's external border, Latvia has implemented the strict Schengen border rules with Russia

Refugees and internally displaced persons:

stateless persons: 280,759 (2012); note - individuals who were Latvian citizens prior to the 1940 Soviet occupation and their descendants were recognized as Latvian citizens when the country's independence was restored in 1991; citizens of the former Soviet Union residing in Latvia who have neither Latvian nor other citizenship are considered non-citizens (officially there is no statelessness in Latvia) and are entitled to non-citizen passports; children born after Latvian independence to stateless parents are entitled to Latvian citizenship upon their parents' request; non-citizens cannot vote or hold certain government jobs and are exempt from military service but can travel visa-free in the EU under the Schengen accord like Latvian citizens; non-citizens can obtain naturalization if they have been permanent residents of Latvia for at least five years, pass tests in Latvian language and history, and know the words of the Latvian national anthem

Illicit drugs:

transshipment and destination point for cocaine, synthetic drugs, opiates, and cannabis from Southwest Asia, Western Europe, Latin America, and neighboring Balkan countries; despite improved legislation, vulnerable to money laundering due to nascent enforcement capabilities and comparatively weak regulation of offshore companies and the gaming industry; CIS organized crime (including counterfeiting, corruption, extortion, stolen cars, and prostitution) accounts for most laundered proceeds
