

## Africa :: Mauritania

### Introduction :: Mauritania

#### Background:

Independent from France in 1960, Mauritania annexed the southern third of the former Spanish Sahara (now Western Sahara) in 1976 but relinquished it after three years of raids by the Polisario guerrilla front seeking independence for the territory. Maaouya Ould Sid Ahmed TAYA seized power in a coup in 1984 and ruled Mauritania with a heavy hand for more than two decades. A series of presidential elections that he held were widely seen as flawed. A bloodless coup in August 2005 deposed President TAYA and ushered in a military council that oversaw a transition to democratic rule. Independent candidate Sidi Ould Cheikh ABDALLAHI was inaugurated in April 2007 as Mauritania's first freely and fairly elected president. His term ended prematurely in August 2008 when a military junta led by General Mohamed Ould Abdel AZIZ deposed him and installed a military council government. AZIZ was subsequently elected president in July 2009 and sworn in the following month. AZIZ sustained injuries from an accidental shooting by his own troops in October 2012 but has continued to maintain his authority. The country continues to experience ethnic tensions among its black population (Afro-Mauritanians) and white and black Moor (Arab-Berber) communities, and confronts a terrorism threat by al-Qa'ida in the Islamic Maghreb (AQIM).

## Economy :: Mauritania

### Economy - overview:

Mauritania's economy is dominated by natural resources and agriculture. Half the population still depends on agriculture and livestock for a livelihood, even though many of the nomads and subsistence farmers were forced into the cities by recurrent droughts in the 1970s and 1980s. Mauritania's extensive mineral resources include iron ore, gold, copper, gypsum, and phosphate rock and exploration is ongoing for uranium, crude oil, and natural gas. Extractive commodities make up 75% of Mauritania's total exports. The nation's coastal waters are among the richest fishing areas in the world, and fishing accounts for 20% of budget revenues, but overexploitation by foreigners threatens this key source of revenue. Risks to Mauritania's economy include its recurring exposure to droughts, dependence on foreign aid and investment, and insecurity in neighboring Mali, as well as significant shortages of infrastructure, institutional capacity, and human capital.

## Transnational Issues :: Mauritania

---

**Disputes - international:**

Mauritanian claims to Western Sahara remain dormant

**Refugees and internally displaced persons:**

**refugees (country of origin):** 26,000 (Western Saharan - Sahrawis) (2012); 57,406 (Mali) (2014)

**Trafficking in persons:**

**current situation:** Mauritania is a source, transit, and destination country for men, women, and children subjected to conditions of forced labor and sex trafficking; adults and children from traditional slave castes are subjected to slavery-related practices rooted in ancestral master-slave relationships; Mauritanian boys called talibe are trafficked within the country by religious teachers for forced begging; Mauritanian girls, as well as girls from Mali, Senegal, The Gambia, and other West African countries are forced into domestic servitude; Mauritanian women and girls are forced into prostitution in the country or transported to countries in the Middle East for the same purpose

**tier rating:** Tier 3 - Mauritania does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; after the previous year's unprecedented progress in prosecuting and convicting trafficking offenders, the government has not convicted any traffickers; the government has not provided adequate protective services to victims or ensure their referral to NGOs, which provide the majority of care to trafficking victims and generally do not receive government financial support; the absence of measures in place to identify trafficking victims among vulnerable populations may have led to victims being punished for acts committed as a result of being trafficked; the effectiveness of the 2007 anti-slavery law remains impaired because the slaves, many of whom are illiterate, are first required to file a legal complaint, and the government provides no programs to assist victims in lodging slavery complaints (2013)
